Magical Realism - Diane White

Opening: August 13, 2010

Exhibition Dates: August 13 - 27, 2010

"Diane White's paintings are created using many traditional still life techniques. However, her work features a unique aspect that she calls, 'magical realism,' referring to a literary genre favored by writers such as Gabriel Garcia Marquez. Lacquer boxes, porcelain cups and other beautiful objects are rendered with dramatic lighting focused on them. A closer look however, reveals subtle indications of a world beyond our normal senses, which interjects itself into the everyday world of objects." — *Linda Matthews*
